Towards a Formal Foundation for DeMarco Data Flow Diagrams	1
Multi-Destination Secure Electronic Mail	13
A Note on the DMC Data Compression Scheme	16
A Window Manager for UNIX	21
Priority Semaphores	24
The Parallel Interpretation of Logic Programs in Distributed Architectures	29
Two-level Grammar as a Functional Programming Language	36
The Solution of Mutual Exclusion Problems which can be Described Graphically	45
A Query Facility to a Network DBMS	55
Inheritance and Kinds of Slots	63
Explaining the Behaviour of Binary Search Trees Under Prolonged Updates: A Model and Simulations	68
Classes of Admissible Permutations that are Generatable by Depth-first Traversals of Ordered Trees	76
Generalizing Active Zones for Set-Theoretic Solid Models	86
Semantics and Problems of Universal Quantification in SQL	90
Semantically Driven Parsing of Context-free Languages	91
Rapidly Converging Iterative Formulae for Finding Square Roots and their Computational Efficiencies	93
Why Functional Programming Matters	98
Constructing Natural Language Interpreters in a Lazy Functional Language	108
Algebraic Identities for Program Calculation	122
The Chalmers Lazy-ML Compiler	127
Non-strict Languages - Programming and Implementation	142
An Optimising Compiler for a Modern Functional Language	152
Functional Programming and Operating Systems	162
Parallel Implementations of Functional Programming Languages	175
An Interactive Solution for the 4-peg Towers of Hanoi	187
AUTO-DFD: An Intelligent Data Flow Processor	194
A Comparison of JSD and DFD as Descriptive Tools	202
A Fixed-Size Bloom Filter for Searching Textual Documents	212
Comparison of Hierarchic Agglomerative Clustering Methods for Document Retrieval	220
An Approximation Algorithm for Space-optimal Encoding of a Text	228
On Implementing two Adaptive Data-compression Schemes	238
Data Encryption based upon Time Reversal Transformations	241
Effect of a Binary Symmetric Channel on the Synchronisation Recovery of Variable Length Codes	246
Transport Protocol Requirements for Distributed Multimedia Information Systems	252
The Nature of Information	262
Efficient Implementation of Rendezvous	267
Crossword Compilation Using Integer Programming	273
Crossword Compiler-Compilation	276
A Fast Iterative Algorithm for Generating Set Partitions	281
First Steps Towards Fully Abstract Semantics for Object-Oriented Languages	290
Inheritance in Actor Based Concurrent Object-Oriented Languages	297
A Proposal for Making Eiffel Type-safe	305
A Compositional Model for Software Reuse	312
The Treatment of Persistent Objects in Arjuna	323
Browsing a la carte in Object-Oriented Databases	333
Writing Concurrent Object-Oriented Programs using Smalltalk-80	341
Formal Hierarchical Object Models for Fast Template Matching	351
Space Multiplexing of Waveguides in Optically Interconnected Multiprocessor Systems	362
The Need for Reduced Byte Stream Instruction Sets	370
Another Postage Stamp Problem	374
Calculating Earthworks Volumes - An Exercise in Geometric Algorithms	377
An Approach to the Support of Software Evolution	386
Implicit System Specification and the Interface Equation	399
UMIST OBJ: a Language for Executable Program Specifications	413
Denotational Semantics of a Command Interpreter and their Implementation in Standard ML	422
Towards a Formal Specification of Floating Point	432
Proving Correctness Properties of a Replicated Synchronous Program	437
COMAR: A Data Format for Integration of CFG Tools	445
An FP-based Design Methodology for Problem-oriented Architectures	453

D. I. Bevan, G. L. Burn, R. J. Karia and J. D. Robson	Principles for the Design of a Distributed Memory Architecture for Parallel Graph Reduction	461
M. C. Er	A New Algorithm for Generating Binary Trees using Rotations	470
J. A. Ellis and P. M. Lepolesa	A Las Vegas Graph Colouring Algorithm	474
D. F. Brailsford and R. J. Beach	<i>Electronic Publishing</i> - a Journal and its Production	482
R. Furuta	An Object-Based Taxonomy for Abstract Structure in Document Models	494
Heather Brown	Standards for Structured Documents	505
I. Ritchie	HYPERTEXT - Moving Towards Large Volumes	516
R. A. Morris	Rendering Digital Type: A Historical and Economic View of Technology	524
P. S. Licker	Human Resource Management and Business Success in Small, Hi-Tech Firms: Some Lessons for Data Processing	533
D. A. Umphress, U. W. Pooch and M. Tanik	Fast Prototyping of a Goal-Oriented Simulation Environment System	541
J. R. Parker	On the conversion of Filled Polygonal Regions from Raster to Vector Representation	549
G. H. Kirby, M. Visvalingam and P. Wade	Recognition and Representation of a Hierarchy of Polygons with Holes	554
A. Quin and Y. Yanagisawa	On Data Compaction of Scanning Curves	563
A. D. Robison, B. J. Hafner and S. S. Skiena	Eight Pieces Cannot cover a Chess Board	567
M. Cosnard and A. G. Ferreira	Generating Permutations on a VLSI Suitable Linear Network	571
